## Our Strategic Directions

---

Our Community Strategic Plan that informed the development of the Delivery Program is based on four key Strategic Directions. Together, these provide a strong foundation for planning the *social, environmental, economic and civic leadership* outcomes for our Shire with the purpose of achieving our shared vision and strategic directions.

These Strategic Directions align with our Community Vision. They also recognise that all our communities share similar aspirations, including a safe and inclusive place to live, a sustainable environment, opportunities for employment and tourism, as well as proactive leadership and essential service and infrastructure delivery.

Under each Strategic Direction are a number of Strategic Objectives, and for each Strategic Objective are a series of Strategies which demonstrate Narrabri Shire's focus for the next 10 years.

# Our Delivery Program

The Strategies identified in the Community Strategic Plan flow down into the Delivery Program. The Delivery Program outlines how Council will deliver and resource these Strategies over the following four years. Council's Delivery Program measures the success of Council achieving its Strategies for the benefit of the community to which it serves.

Specific actions to be completed and the resources required for each financial year are explored further in Council's Operational Plan and Resourcing Strategy. The relationship between the Community Strategic Plan, Delivery Program and Operational Plan is demonstrated in the following figure.

**Figure 2: Integrated Planning and Reporting Elements**

## Measuring and Monitoring our Success

---

Performance measures have been placed against the Strategies in the Delivery Program to enable the community and Council to monitor the achievement of critical success factors for each strategic priority area. Council will gather information on each performance measure and report to Council through bi-annual reviews on how Council and the community are tracking.

Whilst some performance measures can be clearly quantified, this may not necessarily mean the community is aware of, fully appreciates, or is fully satisfied with, the extent of progress. A community survey is proposed every two years to gauge community satisfaction or otherwise with progress and where priorities could or should be assigned to particular areas in the future. Alternatively, community members are encouraged to attend monthly Council meetings.

Council will continue to set measurable targets against its actions in the Operational Plan to allow Council to monitor its progress in achieving the plan.

Child care centers have been forced to reduce their staff numbers to ensure they remain financially viable, which has in turn meant reducing the number of child care places. Whilst available places were reduced for a period of time, enrollments were suspended and enrollment applications have increased. This means that the current figures of available places compared to waiting lists are not necessarily a reflection of what is currently occurring in the community as many parents who have recently lost employment, are looking for employment and will be looking to enroll their children into child care again. Current capacity for childcare is at 285 with a waiting list estimated to be around 150, with mainly children under the age of 2 being in the waiting list.</p>
